

# CELEBRATING 20 YEARS OF SERVICE

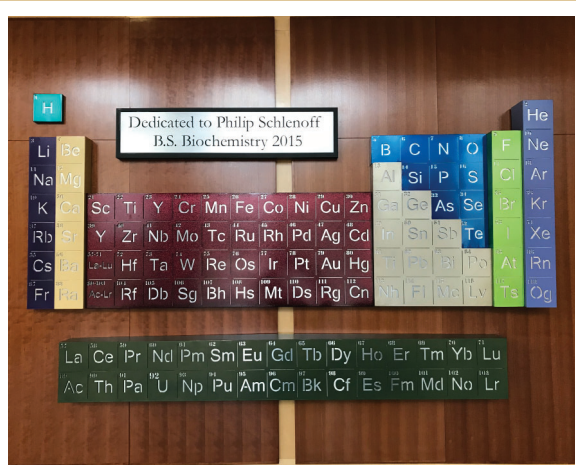

Established as a dual education and fabrication studio in 1999 by President Emeritus Talbot ‘Sandy’ D’Alemberte, Master Craftsman Studio celebrates 20 years of service to the Florida State University community. Housed within FSU Facilities, we work with students and professionals to design, construct, and install projects both on and off campus. Our team consists of six experienced artists who operate state-of-the-art tools, equipment, and machinery to successfully complete the projects we undertake. FSU’s Master Craftsman Studio is excited to continue to educate students while fabricating projects to fit each of our client’s individual needs.

Our mission is to educate the community through the creation and restoration of fine art within the public and private sector. We focus on student education by providing opportunities for interns to work alongside our team of professional artists.

Our fabrication methods include access to advanced machinery such as a waterjet, a laser cutter/engraver, 3D printers, kilns, CNC routers, etc. Additionally, software programs such as Adobe Suite, AutoCAD, Revit, and Rhino are utilized to develop our designs and concepts.

We specialize in creative endeavors such as architectural accoutrements, bronze statuary and plaques, figurative sculpting, stained/leaded glass, cast/formed glass, mosaics, concrete casting, private commissions, murals, woodworking, and restorations.
