

VIII INVENTORY OF EXISTING SITES AND BUILDINGS

The overview of the University includes a general description of the Sites where educational program activities are carried out by the University. The assignable space within educational buildings accommodates instructional, academic support, and institutional support functions of the university. As indicated within the Space Needs Assessment section, the following types of assignable spaces accommodate these functions:

<u>INSTRUCTIONAL</u>	<u>ACADEMIC SUPPORT</u>	<u>INSTRUCTIONAL SUPPORT</u>
Classroom	Study	Office and Computer
Teaching Laboratories	Instructional Media	Campus Support Services
Research Laboratories	Auditorium / Exhibition	
	Teaching Gymnasium	

Table 6 provides information about the Net Assignable Square Feet (NASF) by Sites which make up Main Campus. Space which has a DEMO STATUS of 'CONTINUING' is satisfactory space that will continue to be used and is included in the inventory of space. Space which has a DEMO STATUS of 'PLANNED TERM: 2018' has been singled out for each Site where this type space occurs and is removed from the total space which is considered satisfactory space in the current inventory.

Table 7 identifies the amount of satisfactory eligible space, by space type, for each building which supports the above stated functions. As stated within the Space Needs Assessment section eligible space refers to whether the space meets a need identified as a formula generated space need. The buildings included within this table are only those consider to be part of Main Campus.

Both tables are derived from the BOG Space Data Management Reports.
